Feedback/Update Fwd: COLLATED BUGS : THE TOP TEN

I worked on some of the bugs today, and here is my report:

- > Posting link should be a LARGE BUTTON in all open
- > publishing areas -News
- > and Analysis, Calendar, Discussion, Images, Public
- > Library tracker,
- > Public Library, Pod Park. This should be both larger
- > and more visible –
- > ideas: button or coloured background, enticing
- > mermaids, LO

Done. Results here: <http://www.metamute.org/taxonomy/term/170> or here <http://www.metamute.org/image>

- > Swap contribute and filter in the first level
- > navigation bar. Change
- > wording to SUBMIT CONTENT

Done.

- > New big block with big button in capitals “!!SUBMIT
- > CONTENT!!” followed
- > by sentence ‘ you can post articles, news and much
- > more to this site.
- > Hit submit content and follow the instructions

Done. Here: <http://www.metamute.org/>

- > Move Pod Block away from
- > www.metamute.org/en/user/register
- > <<http://www.metamute.org/en/user/register>> and move
- > the social list
- > block off the main page over to
- > www.metamute.org/en/user/register and
- > only there on the site
- > <<http://www.metamute.org/en/user/register>>

Done.

- > More blocks moving underneath horses publish far
- > left, latest issue on
- > right – social list gone to user and forum topics
- > down
- > <<http://www.metamute.org/en/user/register>>

Done. Since many people say the site is very confusing, Pauline, Josie and me today decided to try a front page layout with a left hand block row with one instead of two columns. (see: <http://www.metamute.org/>) Any opinions on that?

- > Re-design latest issue block separate read (colour)
- > | buy more (colour)
- > clearly – text says current issue – out now info
- > about the content and
- > most important articles not the full list of
- > writers.

Done.

- > Change 'Issues' to 'Archive'

Office decided to change it to "Print Issues" instead.

- > NOT A BUG but... Simon told me a trick which will
- > give us more relevant
- > links instead of <http://metmute.org/node5567> after
- > pasting the title you
- > can paste it again in the field below 'Path Alias',
- > delete all special
- > characters and replace all spaces with hyphens like
- > this
- > Mute-Knowledge-Commons you get a url

Yes and this field caused Mathew Hyland's post to go all weird, because he used this field to input an additional url. So maybe we should take it off for registered users.

That's it for today.

xLaura.
