ELECTROMAGNETIC BODIES: Aether, Desire and Resonance in Art and Technology

URL:

<http://www.v2.nl/>

To 4 June 2006

V2_Institute, Rotterdam, Netherlands

Referring to the pioneering work of Nikola Tesla, the exhibition explores the notions of being and desire in a society determined by our bodily immersion within an ubiquitous and omnipresent electromagnetic realm.

Exhibition: Aether, Desire and Resonance in Art and Technology. Open daily, exc. Mondays, 11.00 - 18.00 until June 4th

V2_Institute for the Unstable Media in collaboration with TENT. Center for Visual Art Rotterdam present Electromagnetic Bodies: Aether, Desire and Resonance in Art and Technology. Referring to the pioneering work of Nikola Tesla (1856 - 1943), the exhibition explores the notions of being and desire in a society determined by our bodily immersion within an ubiquitous and omnipresent electromagnetic realm
